Dear Hanco

Well you have snowed cold we have been having lots of rain. it is slowing my outside work at my new shop. Fence people finished 6ft cyclone fence with 12' drive gate today behind shop. But the were all happy about working in the rain. My friend who will do copying of your book wanted to know if you have the disk that was used to print it out. He says if he had the Disk (or copy) he could print it with correct spacing & not loose any of it, at the end of each page. I trust him, he was my General Manager before buying his paint shop. Changing the subject Hope you can find a small Heater for your car. Also I have not given up on your Typing Stand Just have to many things going on at same time. At least I am never bored But it seems like I never get anything done. But at least I am getting more into this I.F.N. Thing. wished I had more time for it. Someday. well my patrol drivers will be here soon so. I will close. Give my best to Cc.

Your friend

Bill

P.S. Try some of these new self stick stamps
